# Electrical engineering

Website Versuchsanleitungen Deckblatt and attestation card Einschreibung

The electrical engineering practicals take place as scheduled in the 2nd and 3rd semesters. Each test lasts approximately 3 hours (plus preparation and follow-up).

**Note:**
You need a certificate card for the internships, which you will receive after attending an introductory event for the AET internship. The introductory event takes place during the AET-1 lecture in the first semester.
Your grades will be entered on the certificate card. For this reason, you should not lose it, as otherwise you will have to have your grades re-entered, which can be a lot of work.
